#### Another Fight on the New Road.

Some persons opposing the new road from this place to Stanton, are circulating a petition to the Fiscal Court which will meet at Stanton the first Tuesday in October, asking that body to build a bridge at the present river crossing. The intention is to, in this vey, thwart the opening of the new road, as it is a known fact the Court will not build two bridges so close together, and that the new road cannot be opened without a bridge where it crosses the river, as the bank on this side, is a slate cliff, making been a sufferer from appendicitis the opening of a ford impossible. for the past several weeks, was This slate bank which will serve taken to Lexington Wednesday as piers, will greatly lessen the where she was operated on. A friend stepped up to us the other day and asked why we were so opposed to the L. &. N. Being loaded, we pulled a freight to the voters in this issue. If there is a sane or reasomable person in this county, that can explain to us where the justice of this comes in, the writer will never say another word a bout the L. &. N.

The above incident, while, it is within itself very insignificant, it is the experience of every one who receives freight here over the L. & N. The rates over the L. & N. are always more than double any other road when not interfered with, and we believe in interfering.

If other railroads can haul a certain quantity of goods from Chicago to Lexington for 29 cents, we would like to know why the L. & N. has to have 58 cents for hauling it on to Clay City? Other roads carry it ten times as far for one half the money. Is this right?

It has been said that the L. & E. was forced to sell their road. If this is true, would it not be better for this road to be sold to one of the roads that can carry freight ten times as far for onehalf the money? We think so and intend to see that the L. & N. is made to account for its illegal purchase of the L. & E. and made to obey the law as it should be. If you want to help us fight the big corporations, drop a subscription this way, that's all we ask.

Judge Benton in his charge to the Clark county grand jury Monday, the first day of Circuit court, bore mainly on the prosecution of vote buying in the recent primary. We opine from what the Judge said in his charge, that Clark county is far from being free from election corruptions, notwithstanding the strong reform waves eminating from that county before the primary.

The Times believes the Judge will have but little to do in this particular when he comes to Powell at the November term. It now looks as if though Powell is the cleanest county in the district and we always thought so.

Say Mr. voter do you want to see Powell county plunged head long into a financial crisis during the next four years? If you don't then let us suggest that you hunt up your little tack hammer and fetch a few pecks on that part of your body that is usually covered by a \$3 50 John B. Stetson. After you have finished pecking then stop rest and listen, and on the morning of November 4th, 1913 walk out to your front yard gate set one foot upon the stileblock, shift that quid of Star Navy from left to right jaw, fetch a tog at that little bunch of whiskers on your chin, turn your eyes in the direction of the rising sun and there and then appoint yourself a committee of one to take a soher second thought. Then baste thee away to the voting place and dally not by the way. de. When thou art safe witl in the walls of the voting booth and all is as sill there as the hush of night pick up the marking stencil between your breadhooks, raise the stencil and let er fall ker whack on the ballot where your conscience tells you that it will do the most good for Powell county citizenship. Then fold the ballot and let 'er go galligher", then make thy escape if thou can and the praise

### DISPENSARI**E**S!

A free dispensary is a place kep open certain hours of the week with a doctor and generally a nurse in attendance for the free examination of those who need its service. People of means ought to go to their physicians soreness disappeared like magic and pay the regular fee for such serv Inasmuch as physicians always render their services free to the needy anyway, they generally favor the dispensary as saving time. Sometimes these dispensaries, or clinics, are held for all diseases and sometimes for especial classes of disease, such as tuberculosis, or hook worm, or dis eases of the eye, or nose and throat. Such a dispensary is an advantage to the whole community. The needy feel less hesitation about going there when ill than about calling a physician; consequently maladies are often more quickly diagnosed and put under control, and the contagious disease then prevented from spreading. Especially in the case of consumption, it is easier to get an examination of the children of the family in a dispensary than it is at home. The accurate information which can be better secured and tabulated in a dispensary than elsewhere is of great service in any general campaign for public health. A free dispensary can be cheaply start ed and maintained, because physicians are always willing to give an hour or two a week of their time to that work. Are you ready to give a little of your money for it in case one is started in your community?'
